

The following participants in the Victoria 2002 Conference on Information Processing and Entrepreneurial Cognition agreed at the conference to allow their names to be published as potential reviewers in the ENT cognition domain.

Presently, an additional group of possible reviewers is being compiled. Thanks to Norris Krueger for his help in compilation and suggestion. This list is intended to be inclusive, so if you would like to be included please contact Ron Mitchell mitch@business.uvic.ca and indicate the area of specialty within ENT cognition research that you are able to review (e.g., biases, heuristics, etc.; information processing theory/ scripts; methods; opportunity identification, etc.).

Thanks to all for your willingness to participate.

Ron
